PROCEDURE

VRSNow Settings for DJI Phantom 4 RTK/M300

November 2022

DJI Controller Settings

NTRIP host: www.vrsnow.com.au

Port: 2101

Mountpoint:

TVN_RTCM_31 (for GDA94 Network)

TVN_Nearest_RTCM_31 (for GDA94 Nearest base)

20_TVN_RTCM_31 (for GDA2020 Network)

20_TVN_Nearest_RTCM_31 (for GDA2020 nearest)

Eg.

**NTRIP Host:** www.vrsnow.com.au
Port: 2101
Username
password
Mountpoint: 20_TVN_Nearest_RTCM_31

Please note the DJI controller will **not** notify you if you have misspelled the mountpoint (needs to include the underscores) or typed in the username, port or IP address wrong, only that it cannot connect to RTK.

Mobile hotspot or a data sim card placed in the dongle of the controller are the options for receiving network corrections, however if using a data sim in the dongle please ensure this sim has a serviceable data plan.
